

Troubleshooting for Androids:

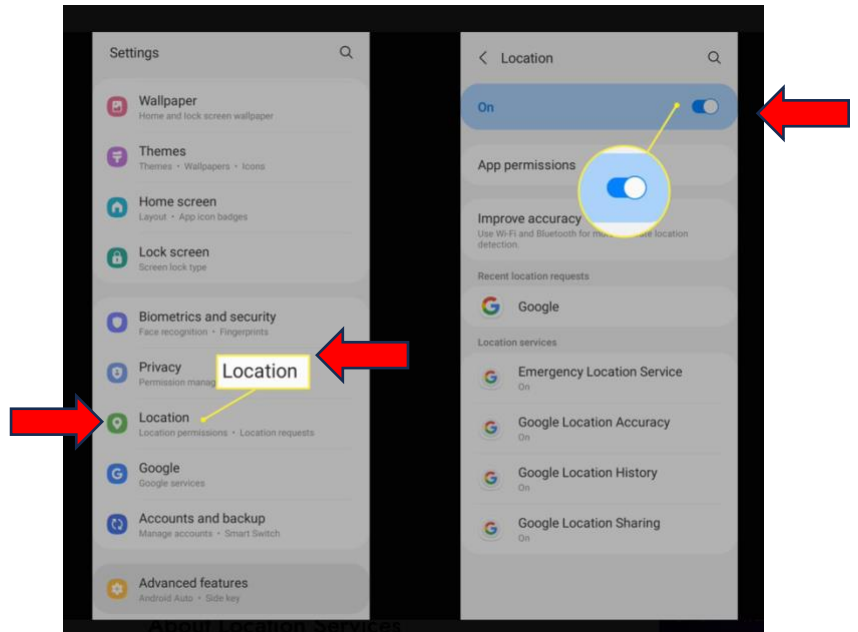

ALLIANCE SERVICES, INC
Your complete healthcare staffing partner

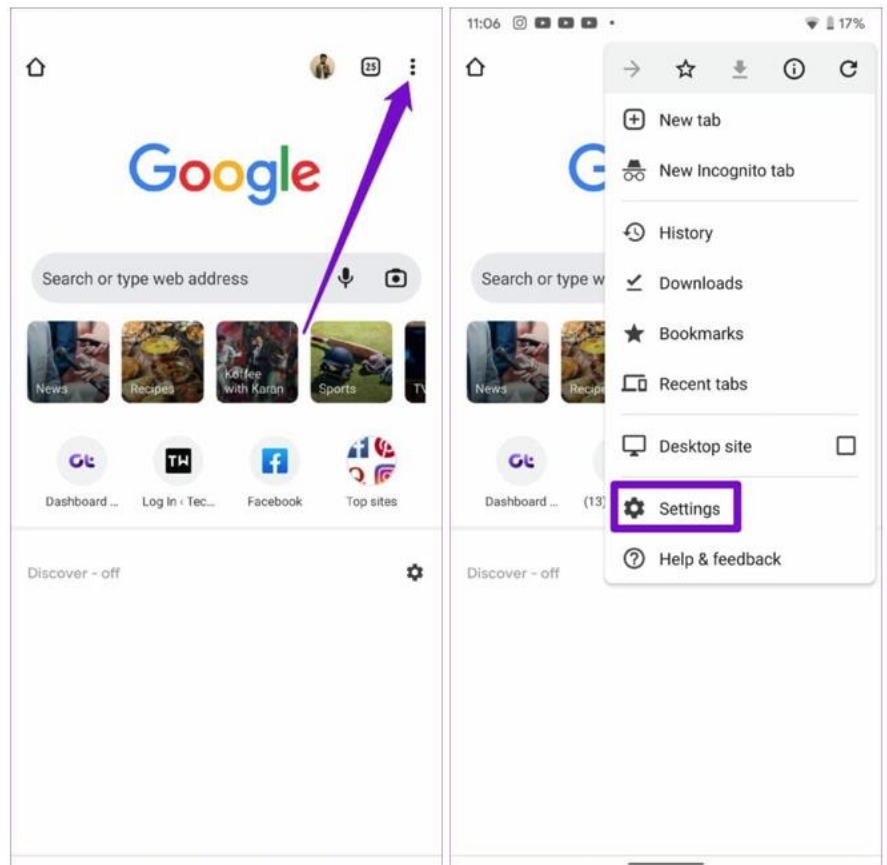

Click on the settings icon and then scroll down and click on "Location." Make sure that Location is toggled to "On."

If your location is already toggled to on, the Workforce Portal may be blocked within Google Chrome. See below.

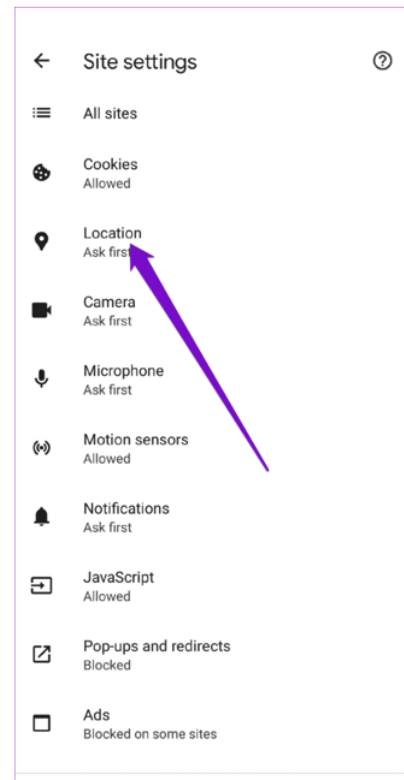

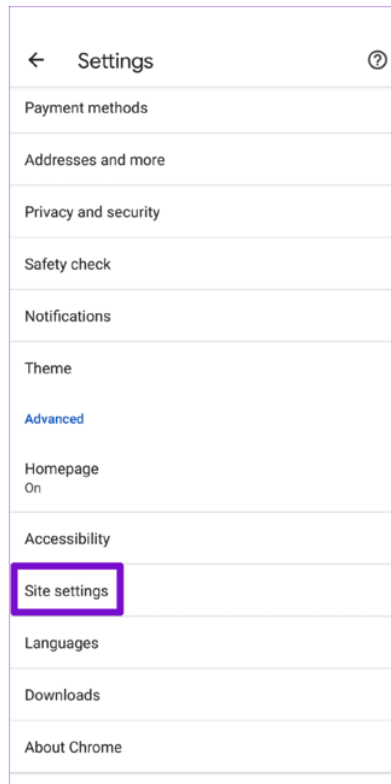

To "unblock" the Workforce Portal, open your Chrome browser and select the 3 vertical dots in the upper right corner of your screen. Then select "Settings."

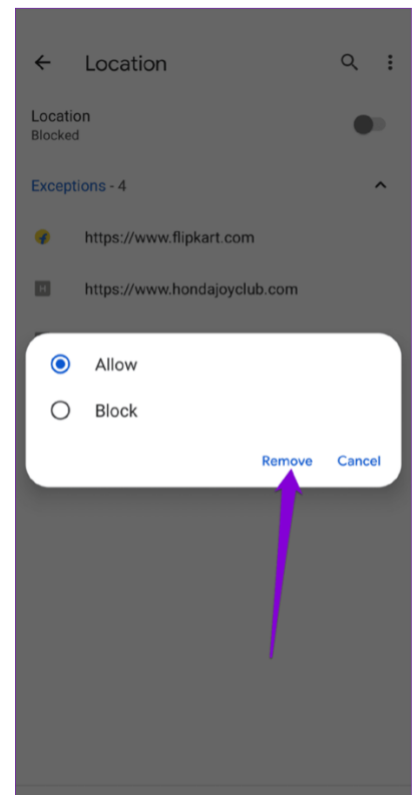

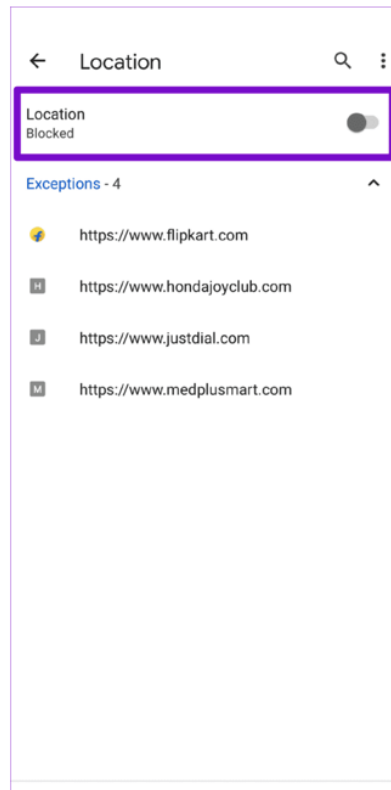

Then select "Site Settings."

Then select "Location."

Once on the location screen, be sure Location is toggled to "On."

Look for the sites that are blocked and if you see our website (www.asi-wi.com) or the Workforce Portal blocked, click on The site in the list and select, "allow."

If you are still having trouble, please call Alliance on-call: 262-677-2180
